Helping Businesses Build Websites Front-End Web Developer & Designer | Figma to Website Conversion Specialist | Vue.js, Quasar, React.js | Familiar with popular CMS platforms WordPress, Wix, and GoHighLevel (GHL)

Plaridel, Central Luzon, Philippines

Summary

I'm a Front-End Developer and Web Designer since 2018 and over 6 years of experience building responsive, high-converting websites and funnels. I specialize in transforming Figma designs into fully functional, performance-optimized web experiences using JavaScript, React.js, Vue.js, and Quasar. I also work extensively with WordPress, GoHighLevel, and custom HTML/CSS builds. My focus is not just on design — but on user experience, speed optimization, and conversion-driven layouts. Knowledge in:- HTML | HTML5,- CSS | CSS3- SASS | SCSS- Tailwind- Bootstrap 4 & 5- Responsive Website- JavaScript | jQuery- React.JS- Vue.JS- Quasar- ChatGPT- Bitbucket- Git- Sourcetree- Microsoft Visual Studio Code- Figma- Adobe Photoshop- GoHighLevel- WordPress | Oxygen | Elementor | Divi Themes- Shopify- Wix- Squarespace- Weebly- Jira- Teams- Trello- Slack- ClickUps- Teamwork- Basecamp

Experience

Digital Solution PH
Front-End Web Developer (Freelance)
August 2025 - Present (11 months)

Provide front-end development and website design services for businesses and agencies.

Specialize in converting Figma designs into responsive websites using HTML, CSS,

JavaScript, Vue.js, and modern frameworks. Also implement WordPress and GoHighLevel solutions including funnels, landing pages, and automation systems.

Eclipsyum
Front-End Developer & Web Designer
January 2026 - June 2026 (6 months)

Chicago, IL

Worked as a remote Front-End Developer and Web Designer for multiple web projects, including EcoBuild Plus, Eclipsyum, EcoBuildHVAC, and Deluxe Wine & Spirits.

Designed website layouts and landing pages in Figma, then developed and implemented them in WordPress using HTML, CSS, Tailwind CSS, JavaScript, PHP, and WordPress tools.

Mainly handled EcoBuildPlus.com, where I improved and maintained the WordPress website, converted key pages into a hybrid HTML/PHP setup, optimized page structure, updated service pages and landing pages, fixed UI/UX issues, improved mobile responsiveness, and supported SEO and lead-generation updates.

Also worked on web design and WordPress development for Eclipsyum.com and DeluxeWineAndSpirits.com, including layout design, page updates, responsive sections, content structure, and visual improvements.

Collaborated with marketing, SEO, and project teams to implement website updates, tracking support, forms, CTAs, redirects, broken link fixes, and general website maintenance.

PartnerMatrix

Front-End Developer

October 2023 - June 2025 (1 year 9 months)

Cebu, Central Visayas, Philippines

MERIDIAN REMOTE TEAMS

Front End Developer

May 2022 - October 2023 (1 year 6 months)

Build/Create, Deliver, Maintain/Fix, existing and New Clients Websites.

CT21 Analytics

Front-End Developer

November 2021 - April 2022 (6 months)

Remote

a. Consistently create well-designed, tested code using best practices for website development, including mobile and responsive site design.

- b. Create websites and user interfaces, using standard HTML/CSS practices, while incorporating data from back-end databases and services.
- c. Create and maintain workflows with teams to provide visibility and to ensure workload balance for consistent visual designs.
- d. Develop or validate testing schedules, addressing all browsers and devices to ensure various computers can access the content.
- e. Maintain updated knowledge of new and emerging industry trends and technology.
- f. Meet regularly with teammates and management to understand and refine business and functional requirements and determine project scopes and specifications.
- g. Develop and maintain strategic operational systems, tools, and processes, including participation in tactical and strategic development projects.
- h. Ensure software stability via regression, support quality assurance, and perform unit and user-acceptance testing to identify bugs and ensure production operations run successfully.
- i. Work quickly and carefully to complete small edits requested by customers, develop plans for completing larger projects, collaborate with colleagues, and suggest new solutions to improve existing websites.
- j. Perform UI designs and coding, creating reusable objects and templates, wireframes for web pages and email templates; manage maintenance, updates, expansions, and scaling of each design.
- k. Perform regular file backups to local directories for recovery.

THATLifestyleNinja
